

MicroClient JrSX

Ultra Low Price, Extremely Energy Efficient

Specifications

System

CPU	Vortex86SX
BIOS	AMI BIOS
Display	XGI Z9S with 32MB DDR
Ethernet	Integrated 10/100 Mbps LAN
Memory	Onboard 128 DDR
HDD	80 to 160 GB (optional)
Power	Single Voltage +5V @ 1080mA
Operating Temperature	0 to +60 C operating temperature
Dimensions & Weight	11.5 x 11.5 x 3.5 cm 505g
Certification	CE, FCC

Features

- 366Mhz 486SX compatible CPU
- 3 x USB 2.0
- 128 MB DDR RAM
- Type I/II Compact Flash Slot
- 10/100 Mbps LAN
- VESA mount
- Ultra Low Power
- 2 x RS-232 Port (optional)
- Mini PCI Socket (optional)
- Wireless LAN (optional)
- 2.5 inch Hard Disk support (optional)
- 24 Bit GPIO (optional)

Options

- WIFI
- 80 to 160 GB Hard drive
- Battery backup
- Automobile power supply

*The **MicroClient JrSX** represents the least expensive x86 compatible computer solution available. The **MicroClient JrSX** uses the revolutionary System on Chip, the Vortex86SX, that integrates a complete computer on a single CPU.*

*The **MicroClient JrSX** is not a general purpose device, but rather an extremely cost effective computer to deploy standalone, embedded applications.*

*The **MicroClient JrSX** works with FreeDos (www.freedos.org/), Windows CE 5.0, and Linux (must be compiled to support math processor emulation)*

Ordering Information

A3-8	MCJrSX standard version
A3-8HD	MCJrSX w/HD option
A3-8PCI	MCJrSX w/miniPCI socket
A3-8GPIO	MCJrSX w/RS232, 24 bit GPIO & miniPCI socket
