

NorhTec WallServers

A Wall Mounted Data Center

Features

- Fanless
- Splash proof
- Secure
- Requires no special environment
- Battery Backup Option
- Power Over Ethernet Option
- Up to Four Network Interfaces
- Integrated Router Option
- WIFI Access Point Option
- Blue Tooth Option
- GPRS, ADSL or CDMA Option
- Custom size cases

Applications

- *Digital PBX*
- *Security System*
- *Access Point*
- *Proximity Marketing*
- *Web Server*

Small Water Resistant WallServer

NorhTec can design and custom build integrated computing solutions that mount on a wall.

*NorhTec's long experience designing energy efficient, fanless computers gives us the capability to provide zero footprint solutions that can be mounted on walls without requiring any special cooling. NorhTec **WallServers** are splash resistant and can feature locks to protect important components and data from vandalism.*

*NorhTec can custom design complete **WallServers** that are energy efficient, cost effective, fanless and reliable. **WallServers** are ideal for factories, retail stores, structured homes and office buildings.*
